**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 16, drawn to a method for initiating a control operation for a user-selectable video game character, classified in class 463, subclass 1.
- II. Claims 17, drawn to a method for emphasizing an advertisement presented in a computer generated original image on a display, classified in class 725, subclass 42.
- III. Claims 18-30, drawn to a method for presenting a second GUI over a first GUI on a computer display, classified in class 345, subclass 594.
- IV. Claims 1-15, drawn to a method for initiating an electronic shopping transaction, classified in class 705, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as video game character presented in a computer generated original image on a display. Invention II has separate utility such as presentation of advertisement. Invention III has separate utility such as presenting a second GUI over a first GUI. Invention IV has separate utility such as initiating an electronic shopping transaction. See MPEP § 806.05(d).

Art Unit: 3621

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
